

SHANMUKHA CHENNUBOINA

ASPIRING AI / ML ENGINEER | FULL-STACK AI BUILDER

PROFILE

Pursuing B.Tech in Computer Science (AI/ML) at Presidency University, Bangalore. Focused on building production-ready AI systems — not just academic prototypes. Already shipped three live projects using React, Node.js, MongoDB, Google Gemini AI, and Deepgram. Certified by Anthropic (MCP & AI Fluency), AWS (Generative AI), and HackerRank. Driven by the belief that intelligent systems should create measurable, real-world impact. Actively seeking AI/ML or full-stack internship opportunities.

PROJECTS

Career Forge

Apr 2026

Solo Developer — AI-Powered Learning Platform

Stack: React · Node.js · MongoDB · Google Gemini · Deepgram

- Built an AI-powered learning retention system that breaks videos into key concepts and generates adaptive questions — turning passive watching into active learning.
- Implemented 'Boss Duel' challenge mechanics and a levelled progression system, making skill acquisition measurable and game-like.
- Integrated Google Gemini for AI processing and Deepgram for speech-to-text, deployed on Render.

AutoDev – VS Code Architecture Engine

May 2026

Solo Developer — AI-Powered VS Code Extension

Stack: VS Code Extension API · Node.js · Google Gemini API · Git Automation

- Built a VS Code extension scaffolding entire architectures from plain-English prompts, generating file structures, dependencies, and an ARCHITECTURE.md with scaling guidance.
- Engineered smart Expand vs. Create detection by scanning package.json to identify the existing framework and safely merge new dependencies without overwriting existing ones.
- Implemented a Developer Memory System to track sessions, log blockers, and auto-generate a portfolio-ready PROJECT_CASE_STUDY.md with stack, time tracked, and challenge breakdown.

AI/ML Exploration & Deep Learning Models

2025 – Present

Personal Research Projects

Stack: Python · TensorFlow · Keras · Scikit-learn · Pandas

- Trained classification, regression, and neural network models on real-world datasets with full EDA and feature engineering pipelines.
- Explored deep learning architectures focused on predictive accuracy and model performance optimisation.

CERTIFICATIONS

Intro to Model Context Protocol

Anthropic | Apr 2026

AI Tool Integration · Structured AI Communication · Multi-step Workflows

AI Fluency: Framework & Foundations

Anthropic | Apr 2026

LLM Fundamentals · Human-AI Interaction · Controlled AI Systems

Introduction to Generative AI

Amazon Web Services (AWS) | Apr 2026

Generative AI · Cloud AI Basics · Real-world GenAI Applications

Data Scientist Course

Simplilearn | Feb 2026

Data Science · Statistical Modelling · ML Pipelines

3D Printing & Design

HP LIFE | Feb 2026

3D Design · Prototyping · Built first robotics project from scratch

Problem Solving (Basic)

HackerRank | May 2026

Algorithms · C Programming · Optimisation & Scalable Logic

Google Analytics Individual Qualification

Google | 2025

Web Analytics · Data-Driven Decision Making

COMPETITIONS & EVENTS

CRACK-A-THON 2026

GDG On Campus – Presidency University | 2026

Team-based hackathon; prototyped AI-driven solution under time constraints.

Project X 1.0 – Mini Project Competition

Presidency University Bangalore | 2025

Participant; presented a mini project to a judging panel.

EDUCATION

2025 – 2029 (Expected)

Presidency University

Bangalore

B.Tech – CS (AI/ML)

TECHNICAL SKILLS

- Python
- Machine Learning
- Deep Learning
- Data Science
- TensorFlow / Keras
- React · Node.js
- MongoDB
- Google Gemini API
- Deepgram API
- Front-End Dev (Vite)
- API Integration
- Google Analytics

LANGUAGES

- English (Fluent)
- Telugu (Native)
- Hindi (Conversational)

HOBBIES

- Creative Storytelling
- Branding & Design
- Reading (Tech / Self-dev)
- Anime & Animation
